Domestic Equity

Fund Families

Victory Group ID

Select

Activate

Searches normally begin from the entire population of domestic equity funds.

Users may, however, PreScreen this group and limit searches to particular fund categories, to a single fund family, or both.

Use the check and list boxes on the left and above to select desired investment categories and/or a fund family. Then click the "Activate" button to bring up these subgroups only.

When this option is in force the "To PreScreen" button on the main control panel will be backlit.

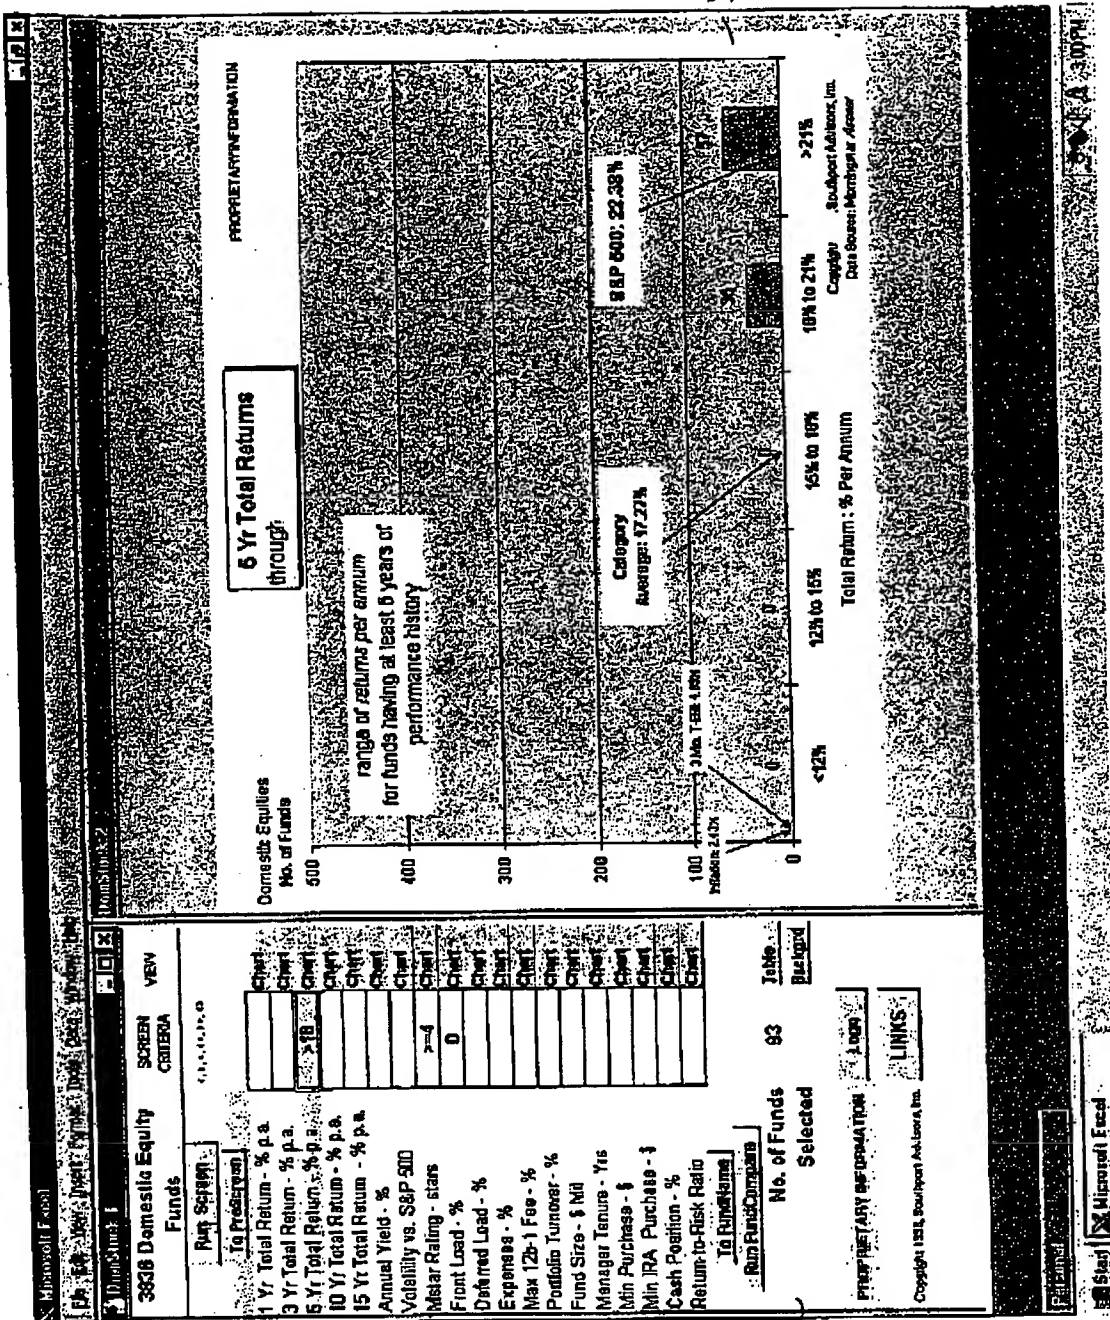

To remove PreScreen choices and restore the whole domestic equity group, click the "DeActivate" button below.

DeActivate
